

7.5

Dealer Hand Analysis (including pegging and crib) Typical 1,000 hands

The odds of two samples of 1,000 being exactly the same are astronomical. But the percentages will form this basic configuration.

How to interpret the chart:

Can the dealer be held scoreless? No, the dealer *always* pegs at least one point. The odds of holding the dealer to one point? One out of a thousand. And the odds of scoring forty or more points? 500 to 1 (1 + 1 = 2 of 1,000). The most common hand for the dealer? Fifteen (87 of 1,000).

Dealer and Non-dealer Scoring Odds

What's the odds of holding the non-dealer:

Points	Odds	Points (or more)	Odds
0	1,000 to 1	31	1,000 to 1
1	250 to 1	30	500 to 1
2	70 to 1	29	333 to 1
3	33 to 1	28	250 to 1
4	14 to 1	27	200 to 1
5	8½ to 1	26	143 to 1
6	5 to 1	25	111 to 1
7	4 to 1	24	91 to 1
8	2½ to 1	23	77 to 1
9	Even	22	56 to 1
		21	44 to 1
		20	29 to 1
		19	22 to 1
		18	17 to 1
		17	11 to 1
		16	8 to 1
		15	7 to 1
		14	5 to 1
		13	4 to 1
		12	3 to 1
		11	2½ to 1
		10	Even

Including pegging

What's the odds of holding the dealer:

Points	Odds	Points (or more)	Odds
0	Not Possible	41	1,000 to 1
1	1,000 to 1	40	500 to 1
2	800 to 1	39	333 to 1
3	500 to 1	38	250 to 1
4	250 to 1	37	200 to 1
5	100 to 1	36	167 to 1
6	53 to 1	35	143 to 1
7	21 to 1	34	125 to 1
8	13 to 1	33	100 to 1
9	9 to 1	32	77 to 1
10	6½ to 1	31	63 to 1
11	5 to 1	30	53 to 1
12	4 to 1	29	43 to 1
13	3 to 1	28	31 to 1
14	2½ to 1	27	23 to 1
15	Even	26	17 to 1
		25	13 to 1
		24	10 to 1
		23	8 to 1
		22	6½ to 1
		21	5 to 1
		20	4 to 1
		19	3½ to 1
		18	3 to 1
		17	2 to 1
		16	Even
